

**Statement by ODF Optronics, Ltd. in Support of
Application for Equipment Authorization**

1. I am a Director of ODF Optronics, Ltd. ("ODF"), which has filed an application for equipment authorization to market and sell its Eyeball R1 device in the United States.
2. The FCC previously authorized the Remington Arms Company, Inc. ("Remington") to operate the Eyeball R1 in the United States. As of April 15, 2008, Remington no longer will market the Eyeball R1. ODF will take over servicing of the device to Remington's current customers and also will market the device in the United States.
3. ODF manufactured the Eyeball R1 on an OEM basis for Remington. ODF supported Remington's FCC equipment authorization application by providing the test results and other supporting technical information. ODF will continue to manufacture the Eyeball R1 with the same specifications as the device it manufactured for Remington, and thus will rely on those same test results in support of its application.
4. Pursuant to Part 15 of the Commission's rules, ODF, which is based on Tel Aviv, Israel, contracted with QualiTech EMC Laboratory ("QualiTech"), located in Petah-Tikva, Israel, to provide a report of test results in support of Remington's application. QualiTech, a certified lab, issued those test results on August 14, 2005, which results are attached to ODF's application.
5. ODF certifies that the information in the QualiTech Test Report is true and accurate and reflects the operations of the Eyeball R1 device that will be marketed by ODF.

Respectfully Submitted,

Asher Gendelman
Director
ODF Optronics, Ltd.
